

Close a Review Without Losing the Objection

Track comment disposition, verification and reopened decisions across revision rounds

ENGLISH · 1.0 · OCTOBER 2026

SAMPLE

Unpublished review edition. New product terms and checkout are not approved.

Start with one bounded decision

A document has no visible comments, yet no one knows whether the objections were fixed, rejected or simply deleted. A clean interface is not a useful closure record. This kit keeps the original objection as a durable row, records the chosen response, and checks the evidence needed for closure under a small explicit policy. It is designed for collaborative review, not employee scoring.

Editors and project leads who need a clear record of what happened to each review comment.

Turn a review thread into a comment ledger with explicit dispositions, verification references and closure checks. Includes original examples, a local checker and a reusable review decision sheet.

One method to try

Preserve the objection before editing

Assign a stable comment ID and record a concise statement of the concern. The input ledger intentionally uses a reference rather than private comment text, so teams can keep confidential discussion in its authorized system. Do not repurpose an ID for a new objection. If a comment splits into two actions, create two child comments and record the relationship in the decision sheet.

Sample boundary

This sample stops here. The full review package contains the input dictionary, worked case, calculator instructions, controlled-change exercise, answer key and reusable CSV templates.
